

LocalStack 2.0

1. Introduction
2. Demo with Terraform
3. Is it worth it?
4. LocalStack PRO

Introduction

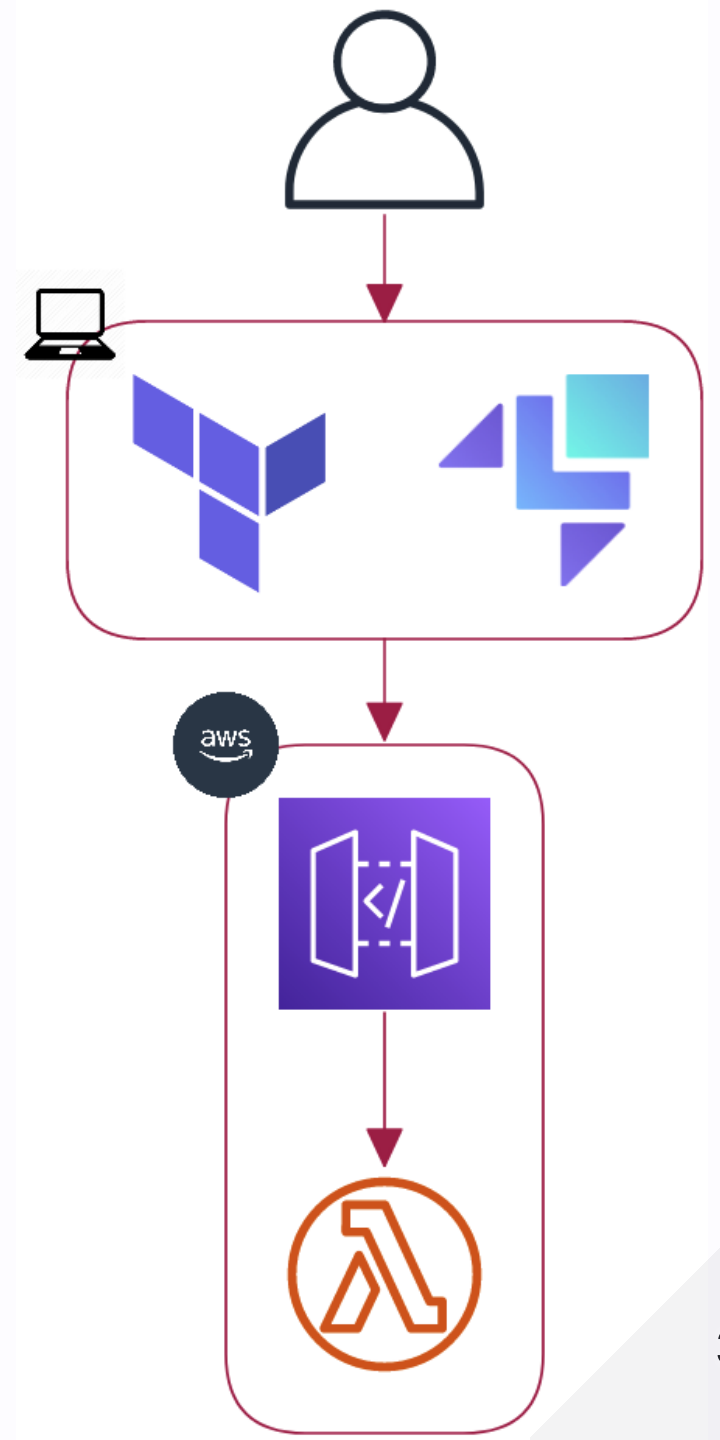

- What is **LocalStack**?
- What is it for?
 - Accelerate Dev and Test loop
 - Improve quality through simplified testing
 - Save time and resources
- Good **integrations** 🙌

Terraform

Let's get our hands dirty 💪!

- Api gateway + Lambda
- Deployment time:
 - ~30s AWS
 - ~60s LocalStack
- Let's change Lambda runtime?

Is it worth it?

! OPINIONS MY OWN !

- Be **careful** with providers
- LocalStack **almost** emulates AWS
- Community edition does **not** cover all services
- **Inconvenience** of another layer to maintain
-  Accelerate Dev and Test loop
-  Improve quality through simplified testing
-  ~  Save time and resources (**serverful**)

LocalStack PRO

- Covers **most of** AWS services
- **35\$** per developer monthly
- IAM security included ¿🤔?
